

ASTIK KUSHWAHA

+91-6388106091 | astikkushwaha30@gmail.com | [LinkedIn](#) | [GitHub](#) | Immediate Joiner

PROFESSIONAL SUMMARY

Engineer with 1+ year of experience building scalable backend systems, RESTful APIs, and full-stack applications using Python, Java, Spring Boot, and ReactJS. Built agentic AI applications with LangChain and LangGraph, and automated CI/CD pipelines with Docker, Kubernetes, and Jenkins on AWS. NASSCOM-Certified AI DevOps Engineer and IBM CI/CD Automation Engineer. Immediate joiner seeking Software Engineer roles.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, C, C++, HTML, CSS

AI / ML: LangChain, LangGraph, RAG, Prompt Engineering, LLM Evaluation, Generative AI, NLP, Hugging Face, Scikit-learn, TensorFlow (familiar), LSTM, Random Forest, Anomaly Detection, Feature Engineering, PyTorch, Kafka

Data & Pipelines: Pandas, NumPy, Matplotlib, ETL Pipelines, MySQL, MongoDB, Query Optimization, Data Annotation, Data Preprocessing

DevOps & Cloud: Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, AWS, MLOps, Cloud Native, DynamoDB

Backend / Frameworks: Flask, REST API, Spring Boot, Microservices, ReactJS, MVC, OOP, Design Patterns, Data Structures & Algorithms, Git, Github, Unit Testing, Agile / Scrum

PROFESSIONAL EXPERIENCE

AI / LLM Analyst — Innodata

Mar 2026 – May 2026

- Evaluated and validated **10,000+** LLM-generated AI responses monthly, maintaining **95%+** accuracy standards; designed prompt engineering frameworks to reduce model errors and align outputs with quality requirements.
- Executed data annotation and QA workflows on NLP datasets for text classification, summarization, and conversational AI; identified model failure patterns and delivered feedback that improved LLM response accuracy.
- Collaborated in Agile/Scrum sprints with ML engineers and data scientists to deliver annotated datasets on schedule for LLM fine-tuning pipelines.

AI DevOps Engineer — Rooman Technologies (NASSCOM Certified Trainee)

Sep 2024 – Feb 2025

- Automated end-to-end CI/CD pipelines (Jenkins, GitHub Actions); containerized Spring Boot microservices with Docker and Kubernetes, achieving **99%** production uptime with zero-downtime deployments.
- Managed AWS infrastructure (EC2) deployed and maintained ML/AI applications in production; operationalized model deployment workflows bridging data science and MLOps.
- Built reusable Dockerfiles and Kubernetes manifests (YAML), eliminating manual setup steps and standardizing deployment across environments.

Full Stack Developer Intern — Varcons Pvt Ltd

May 2023 – Jul 2023

- Built responsive web applications using ReactJS, HTML, CSS, and JavaScript, boosting user engagement by **30%**.
- Developed and optimized REST APIs with SQL queries, reducing average response time by **20%**.
- Collaborated in Agile sprints on system integration and testing, reducing post-release issues by **25%**.

PROJECTS

Agentic AI Code Assistant | Python • LangChain • LangGraph • OpenAI API • Streamlit

- Built an **agentic AI code assistant** with **5+ specialized workflows** for code generation, debugging, refactoring, explanation, and documentation.
- Implemented conversation memory and prompt engineering, increasing response relevance by approximately **20–25%** during functional testing.
- Designed a modular architecture that reduced the effort required to integrate new AI tools and workflows by **40%**.
- Integrated OpenAI API with structured output parsing and error handling, improving response consistency by **20%** and reducing invalid outputs by **15%**.

Chatbot Agent with Memory | Python • LangChain • OpenAI • Conversation Memory • RAG

- Developed an AI chatbot with **persistent conversation memory**, enabling accurate context retention across **20+ consecutive user interactions**.
- Integrated LangChain memory modules with OpenAI GPT, improving conversational coherence by **45%** compared to stateless responses.
- Optimized conversation history handling, reducing prompt reconstruction time by **30%**.
- Implemented dynamic prompt construction and history management, reducing redundant user inputs by **60%**.

Online Job Portal — Java Full Stack | Java • Spring Boot • ReactJS • MySQL • MongoDB • Docker • Jenkins

- Built a **full-stack recruitment platform** supporting **3 user roles** (Admin, Recruiter, Candidate) with secure authentication and authorization.
- Implemented Docker containerization and Jenkins CI/CD pipelines, decreasing deployment time by **60%**.
- Designed normalized MySQL and MongoDB schemas capable of handling **10,000+ application records** efficiently.
- Applied Spring Security, JWT authentication, and input validation to strengthen application security and reliability.

CERTIFICATIONS

Certified AI DevOps Engineer – NASSCOM | Certified CI/CD Pipeline Automation – IBM

Mastering Generative AI: LLMs, LangChain, RAG & Chatbots – Udemy | Data Science Mastery: Excel & Python, Java DSA – Udemy

AI Fluency: Framework & Foundations – Anthropic | Claude Code in Action – Anthropic |

Full Stack Web Development with Django and Angular8 - Infosys

EDUCATION

B.Tech/B.E. Computer Science & Engineering | ACS College of Engineering, VTU Bangalore | Graduated 2025 | CGPA: 7.8 / 10

Notice Period: Immediate Joiner | Expected CTC: ₹6–8 LPA | Preferred Locations: Gurgaon | Bangalore | Hyderabad | Pune | Delhi NCR | PAN INDIA
