PROFESSIONAL SUMMARY

Early-career Software Engineer with 1+ year of experience in backend development, API development, and full-stack application development using Java, Python, Spring Boot, and ReactJS. Strong foundation in Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), RESTful APIs, microservices, and cloud technologies. Hands-on experience with AWS, Docker, Kubernetes, Jenkins, and CI/CD for building and deploying scalable applications. Experienced in Generative AI, AI Agents, Retrieval-Augmented Generation (RAG), LangChain, LangGraph, and prompt engineering to develop intelligent AI-powered solutions. Passionate about designing reliable, scalable systems, solving complex engineering problems, and contributing to high-impact software products in Agile environments.

TECHNICAL SKILLS

Languages: Python, Java 17, TypeScript, SQL, C, C++

Frontend: ReactJS, HTML, CSS, JavaScript

Backend & Frameworks: RESTful APIs, Spring Boot, Spring Security, JWT Authentication, Microservices, Client-Server Architecture, MVC, OOP, System Design, Data Structures & Algorithms, Flask, JSON

Cloud & DevOps: AWS (EC2), Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, MLOps, Cloud Native

Databases & Data: MySQL, MongoDB, Query Optimization, ETL Pipelines, Data Preprocessing, Vector Databases (ChromaDB), DynamoDB

Data Analytics: Power BI, Tableau, Excel, Pandas, NumPy

AI/ML: LangChain, LangGraph, RAG, Prompt Engineering, LLM Evaluation, Hugging Face, Scikit-learn, PyTorch, TensorFlow, Kafka, MLOps

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Postman, Replit

PROFESSIONAL EXPERIENCE

AI & LLM Analyst — Innodata

Mar 2026 – May 2026

- Evaluated and validated 10,000+ LLM-generated AI responses monthly, maintaining 95%+ accuracy standards; created prompt engineering frameworks to reduce model errors and align outputs with quality requirements.
- Executed **10,000+ data annotation and QA tasks** across NLP datasets for text classification, summarization, and conversational AI; identified **500+ model failure patterns** and provided actionable feedback that improved LLM response accuracy by **15–20%**.
- Collaborated with **ML engineers and data scientists across Agile/Scrum sprints** to deliver **1000+ high-quality annotated data samples** on schedule, supporting LLM fine-tuning pipelines and reducing dataset preparation time by **30%**.

AI DevOps Engineer — Roonan Technologies (NASSCOM Certified Trainee)

Sep 2024 – Feb 2025

- Automated end-to-end CI/CD pipelines (Jenkins, GitHub Actions); containerized Spring Boot microservices with Docker and Kubernetes, achieving 99% production uptime with zero-downtime deployments.
- Managed AWS infrastructure (EC2), deployed and maintained ML/AI applications in production; operationalized model deployment workflows bridging data science and MLOps.
- Built and optimized **15+ reusable Dockerfiles and Kubernetes YAML manifests**, eliminating **80% of manual environment setup steps** and standardizing application deployment across **development, testing, and production environments**.

Full Stack Developer — Varcons Pvt Ltd

May 2023 – Jul 2023

- Built responsive web applications using ReactJS, HTML, CSS, and JavaScript, boosting user engagement by 30%.
- Developed and enhanced REST APIs with SQL queries, reducing average response time by 20%.
- Collaborated in Agile sprints on system integration and testing, reducing post-release issues by 25%.

SELECTED PROJECTS

Online Job Portal — Java Full Stack | Java, Spring Boot, ReactJS, MySQL, MongoDB, Docker, Jenkins, RESTful API

[Link](#)

- Designed a full-stack recruitment platform supporting 3 user roles (Admin, Employer, Candidate) with secure authentication and authorization.
- Applied Spring Security and JWT authentication with input validation to strengthen application security, access control, and reliability.
- Implemented Docker containerization and Jenkins CI/CD pipelines, decreasing deployment time by 80%.
- Planned normalized MySQL and MongoDB schemas capable of handling 10,000+ application records efficiently.

Agentic AI Code Assistant (Multi-Agent System) | Python, LangChain, LangGraph, OpenAI API, Streamlit

[Link](#)

- Engineered an agentic AI code assistant with 5+ specialized workflows for code generation, debugging, explanation, and documentation.
- Implemented conversation memory and prompt engineering, increasing response relevance by 20–25%.
- Designed a modular architecture that reduced the effort required to integrate new AI tools and workflows by 40%.
- Integrated OpenAI API with structured output parsing and error handling, improving response consistency by 20% and reducing invalid outputs by 15%.

AI Chatbot Agent with Persistent Memory | Python, LangChain, OpenAI, Conversation Memory, RAG

[Link](#)

- Developed an AI chatbot with persistent conversation memory, enabling accurate context retention across 20+ consecutive user interactions.
- Integrated LangChain memory modules with OpenAI GPT, improving conversational coherence by 45% compared to stateless responses.
- Streamlined conversation history handling and dynamic prompt construction, reducing prompt reconstruction time by 30% and redundant user inputs by 60%.

CERTIFICATIONS

Certified AI DevOps Engineer – NASSCOM | Certified CI/CD Pipeline Automation – IBM | Mastering Generative AI: LLMs, LangChain, RAG and Chatbots – Udemy | Data Science Mastery: Excel and Python, Java DSA – Udemy | AI Fluency: Framework and Foundations – Anthropic | Claude Code in Action – Anthropic | Full Stack Web Development with Django and Angular 8 – Infosys | Oracle Agentic AI Foundation Associate – Oracle

EDUCATION

B.E. Computer Science Engineering, ACS College of Engineering (VTU, Bangalore) — Graduated 2025 CGPA: 7.8/10
